BIRTHPLACES BY PROVINCES

This Bulletin, the fifteenth of the series dealing with the Census of population, relates to the classification of the people enumerated in the Seventh Census by (1) province of birth of the native born and (2) country of birth of the immigrant population.

Sources of Population Increase:- The Census of 1931 gave a population of 10,376,786 for Canada as against 8,787,949 in 1921. This represented a ten year increase of 1,588,837 or 18.08 per cent for the last Census over the previous one. The Census of 1921 gave an increase of 1,581,840 or 21.95 per cent over the 1911 Census.

Of the total increase in population, shown by the last Census over the previous one, 1,236,511 or 77.8 per cent was contributed by the native born, 119,298 or 7.6 per cent by persons born elsewhere in the Empire, leaving 232,416 or 14.6 per cent born in foreign countries.

Table I shows the population of Canada distributed by provinces together with the numerical and per cent increase or decrease from 1921 to 1931 by provinces.

Decennial Distribution:- The per cent distribution of the population

according to birthplace, at each census during the past 40 years was as follows:-

in 1881 in a total population of 4,324,810 the native born was 86.06 per cent, the British born 11.07 per cent and the alien born 2.87 per cent. In 1891 in a population of 4,833,239 the native born was 86.68 per cent, the British born 10.15 per cent and the alien born 3.17 per cent. In 1901 in a population of 5,371,315 the native born was 86.98 per cent, the British born 7.84 per cent and the alien born 5.18 per cent. In 1911 in a population of 7,206,643 the native born was 77.98 per cent, the British born 11.58 per cent and the alien born 10.44 per cent. In 1921 in a total population of 8,788,483, the native born was 77.75 per cent, the British born 12.12 per cent and the alien born 10.13 per cent; while in 1931 in a total population of 10,376,786, the native born was 77.76 per cent of the total, the British born 11.41 per cent and the alien born 10.83 per cent.

Table IV classifies the population by birthplace in 1931 and in comparison with the two previous Censuses. It also shows the numerical and per cent variations.

In 1931 the native born constituted 77.76 per cent of the total population of Canada as against 77.75 per cent in 1921; 77.98 per cent in 1911. In 1901 before the provinces of Saskatchewan and Alberta were organized the native born were 86.98 per cent of the total population of Canada. According to the last Census persons born within the Empire made up 89.18 per cent of the population as against 89.87 per cent in 1921 and 89.56 per cent in 1911.

The slight decrease in the per cent proportion of the Canadian and British born shown by the last Census as compared with previous ones is attributable, largely, to the increase shown by the European section of the "Foreign born" which advanced from a per cent proportion of 5.23 in 1921 to 6.88 in 1931.

The most significant decrease in the Foreign born was registered for United States born which fell from a total of 374,022 in 1921 to 344,574 in 1931. At the last Census they were only 5.32 per cent of the total population as compared with 4.25 per cent in 1921 and 4.21 per cent in 1911.

The classifications of the foreign born population according to birthplaces, so far as they relate to European stocks, are based on post-war political boundaries in the last Census, as well as in the previous one.
